pCare™ Interactive Patient Systems to Exhibit at HIMSS 2016 Intelligent Health Pavilion™

February 12, 2016 – New York, NY – pCare Interactive Patient Systems from TVR Communications will be featured at the HIMSS 2016 Intelligent Health Pavilion™ in Las Vegas, February 29 through March 4. pCare, rated KLAS Category Leader for Interactive Patient Systems in the 2015/2016 Best in KLAS: Software & Services report, will be part of the educational demonstrations in the Labor, Delivery and Recovery room and Patient Care room.

pCare joins partners OBIX, Cbord, Stanley Healthcare, Ascom, and many other healthcare solution leaders to highlight how multiple technologies can seamlessly interoperate with state-of-the-art medical equipment to improve the overall patient care environment.

pCare helps improve the patient experience by delivering a variety of communication tools across care settings, such as inpatient and ambulatory, to fixed and mobile devices. It is fully interoperable with hospital systems such as EHR, food service, climate control, lighting control, service recovery, patient comprehension and feedback, and real time location systems (RTLS) to help deliver safety, quality, and service improvements.

“We are excited to be collaborating with such innovative partners and showcase pCare Interactive Patient Systems in the Intelligent Health Pavilion,” said Frank Forte, Chief Business Development Officer, TVR Communications. “The Intelligent Hospital is a terrific opportunity to bring together the power of new technology and to show how seamlessly pCare integrates with – and enhances - hospital systems.”

The HIMSS 2016 Intelligent Health Pavilion is located in Exhibit Hall G, Booth 11655 in the Sands Expo Center. In addition to the LDR room and Patient Care room, the pCare team will also be in kiosk #36.
